INTRODUCTION

Utah Emergency Department Encounter Database

Administrative Rule R426-1-7(i) mandates all Utah licensed hospitals to report information on emergency department patient encounters. The rule defines the data elements which hospitals are required to submit to the Bureau of Emergency Medical Services under statute and administrative rules specifically for the purpose of constructing a statewide Emergency Department Encounter Database. The database contains the consolidated information on complete billing, medical codes, personal characteristics describing a patient, services received, and charges billed for each patient emergency department (ED) encounter. The ED Encounter Public Data Set includes the combined data on all ED outpatient visits and ED inpatient admissions. A new field Encounter Type with values of 'o' and 'i' has been added to the record layout starting in 1999. Caution should be used when comparing this data with previous years as they only included ED outpatient visits.

All forty eligible hospitals submitted data in every calendar quarter (3-month period) in 1999, with the exception of San Juan Hospital missing fourth quarter and Tooele Valley Regional Medical Center submitting only partial first quarter data due to data processing problems.

Public-Use Data Files (PDF)

Public-Use Data Files are designed to provide general health care information to a wide spectrum of users with minimal controls. A request for a PDF can be approved by the Director of Bureau of Emergency Medical Services without further review.

Two different public data files are available for 1999 Emergency Department Encounter Data (see page 4 for data elements and file descriptions).

Data Processing and Quality

Data submission: The State Emergency Medical Services Committee provides data element definitions to ensure all hospitals will report similar data. The Bureau of Emergency Medical Services receives quarterly Emergency Department Encounter Data from hospitals in various formats and media. The data are converted into a standardized format.

System Edits: The data are validated through a process of automated editing and report verification. Each record is subjected to a series of edits that check for accuracy, consistency, completeness, and conformity with the definitions specified in the Utah Hospital Emergency Patient Encounter Data Submittal Manual. Records failing the edit check are returned to the data supplier for correction or comment.

Hospital Reviews: Each hospital is provided with a 35-day review period to validate the compiled data against their hospital records. Any inconsistencies discovered by the hospitals are reevaluated or corrected.

Missing Values: When dealing with unknown values, it is important to distinguish between systematic omission by hospitals, ie., reporting exemption granted for particular data elements, coding problems that deemed the entire data from the hospital as unuseable; and non-systematic omission, ie., coding problems, invalid codes, etc. While systematic omission creates potential bias, non-systematic omission is assumed to occur randomly. The user is advised to examine missing values by hospitals for each data element to be used.

Patient Confidentiality

The Committee has taken considerable efforts to ensure that no individual patient could be identified from the PDF. Patient's age and payers are grouped. The data elements for the following specific conditions are concealed by coding them at the state level: (1) Utah zip codes where there are less than 30 ED encounters per year are coded as the county abbreviation, and out-of-state zip codes where there are less than 30 ED encounters are coded as the state abbreviation, (2) age, sex and zip code are encrypted as 66, E, and -6666, respectively, if the patient's Major Diagnosis Code (MDC) is 25 "Human Immunodeficiency Virus Infection" or if the Diagnosis Related Group (DRG) is 433-437 "Alcohol/Drug Abuse or Dependence".

Agreement to Protect Patient Confidentiality

The data collected by the Utah Department of Health may be used only for the purpose of health statistical reporting and analysis or as specified in the user's written request for the data. Any effort to determine the identity of any reported case or any attempt to link this data set with individually identifiable records is prohibited.

Uses of Emergency Department Data

The PDF includes data on charges and length of stay in hours (LOSH). Several factors affect the comparability of charge and LOSH across hospitals, such as case-mix and severity complexity, payer-mix, market areas and hospital ownership, affiliation or teaching status. Any analysis of charge or LOSH at the hospital level should consider the above factors.

Data Format

Fixed ASCII is the standard format for the public data file, on a CD-ROM. Requests for other formats, such as a SAS dataset, will be considered.

Citation

Any statistical reporting or analysis based on the data shall cite the source as the following:

Redistribution

User shall not redistribute the Utah Emergency Department Encounter Data File in its original format. User shall not redistribute any data products derived from the file without written permission from the Bureau of Emergency Medical Services, Utah Department of Health.

Source of Admission for Non-Newborns

0 = Newborns

1 = Physician Referral

The patient was admitted to this facility upon the recommendation of his or her personal physician.
(See code 3 if the physician has an HMO affiliation.)

2 = Clinic Referral

The patient was admitted to this facility upon recommendation of this facility's clinic physician.

3 = HMO referral

The patient was admitted to this facility upon the recommendation of a health maintenance organization (HMO) physician.

4 = Transfer from a hospital

The patient was admitted to this facility as a transfer from an acute care facility where he or she was an inpatient.

5 = Transfer from a skilled nursing facility

The patient was admitted to this facility as a transfer from a skilled nursing facility where he or she was an inpatient.

6 = Transfer from another health care facility

The patient was admitted to this facility as a transfer from a health care facility other than an acute care facility or skilled nursing facility.

7 = Emergency Department

The patient was admitted to this facility upon the recommendation of this facility's Emergency Department physician.

8 = Court/Law enforcement

The patient was admitted to this facility upon the direction of a court of law, or upon the request of a law enforcement agency representative.

9 = Information not available

The means by which the patient was admitted to this hospital is not known.

Blank = Not reported

Source of Admission for Newborns

- 0 = Non newborns
- 1 = Normal delivery
A baby delivered without complications.
- 2 = Premature delivery
A baby delivered with time or weight factors qualifying it for premature status.
- 3 = Sick baby
A baby delivered with medical complications, other than those relating to premature status.
- 4 = Extramural birth
A baby born in a non-sterile environment.
- 9 = Information not available.
- Blank = Not reported

Length of Stay in hours

Total hours stayed in hospital from the hour of admission to the hour of release.

Blank = Not reported

Patient's Discharge Status

- 01 = Release to home or self care, routine release
- 02 = Released/transferred to another short-term general hospital
- 03 = Released/transferred to skilled nursing facility
- 04 = Released/transferred to an intermediate care facility
- 05 = Released/transferred to another type of institution
- 06 = Released/transferred to home under care of organized home health service organization
- 07 = Left against medical advice
- 08 = Released/transferred to home under care of a home IV provider
- 20 = Expired
- 40 = Expired at home

Patient's Residential Postal Zip Code

84000-84799 = Zip codes in Utah
-4444=Homeless (word homeless or homeless code of ZZZZZ given as address)
-5555=Unknown Utah (Unknown/invalid zip code with Utah address)
(Note: If the city is present in the address but the zip code is not, the zip code variable is coded as -5555 while the county variable is coded with the actual county identifier)
-6666=Encrypted (confidential data)
-8888=Unknown (completely missing address information)
-9999=Outside U.S.A. (foreign address)

Helpful Hint: A quick way to identify the city associated with a zip code is to use the United States Postal Service website:
http://www.usps.gov/ncsc/lookups/lookup_ctystzip.html

If less than 30 encounters occurred for a Utah zip code area, this zip code was mapped into the county code:

Outlier, Total Charge

0 = No
1 = Yes

NOTE: A charge is an outlier if it is above 2.5 standard deviations from the mean of facility charges. Means and standard deviations are APR-DRG specific and calculated at the state level for a calendar year.

Outlier, Length of Stay in hours

0 = No
1 = Yes

NOTE: A length of stay is an outlier if it is above 2.5 standard deviations from the mean of the length of stay. Means and standard deviations are APR-DRG specific and calculated at the state level for a calendar year.
